AppArmor profile is installed on cks7262-node1	✓
Node cks7262-node1 has label	✓
Deployment exists and has 1 not-ready replicas	✗
Deployment has container with correct image	✓
Deployment has NodeSelector	✓
AppArmor profile on container level defined	✗
File /opt/course/9/logs exists with container logs	✗

Question 10	**3** of **5**
RuntimeClass for runsc exists	✓
Pod is running with single container and correct image	✓
Pod has nodeName	✓
Pod has runtimeClassName	✗
File /opt/course/10/gvisor-test-dmesg contains dmesg output	✗

Question 11	**1** of **2**
File /opt/course/11/etcd-secret-content contains ETCD secret content	✗
File /opt/course/11/database-password contains correct value	✓

Question 12	**1** of **3**
File /opt/course/12/secret1 contains correct value	✗
File /opt/course/12/secret2 contains correct value	✓
File /opt/course/12/secret3 contains correct value	✗

Question 13	**0** of **6**
NetworkPolicy metadata-deny exists	✗
NetworkPolicy metadata-allow exists	✗
NetworkPolicy metadata-deny denies access to metadata server	✗
NetworkPolicy metadata-deny still allows other access	✗
NetworkPolicy metadata-allow allows access to metadata server	✗
NetworkPolicy metadata-allow still allows other access	✗

Question 14	**0** of **2**
Deployments using Syscall "kill" scaled to 0 replicas	✗
Only Deployments not using Syscall "kill" are up	✗
